Product Description

For Abloh, the museum catalogue is another opportunity to question everything. This special-edition monograph, produced in close collaboration with the artist himself, explores his creative output in a three-books-in-one format. The catalogue section offers an overview of Abloh's inter-disciplinary practice by Michael Darling and features essays and interviews with key voices in art, fashion, design, and architecture, including Taiye Selasi, Lou Stoppard, Michael Rock, Samir Bantal, Rem Koolhaas, and Anja Aronowsky Cronberg. In the archives section, more than 1800 never-before-seen images pulled from the artist's personal files reveal the remarkable breadth of his influences and collaborations. And the index cross references the catalogue plates-Abloh's works-with his projects and process, using a vocabulary of themes developed by Abloh. In addition to unique packaging, Abloh, founder of the fashion brand Off-White™ and men's artistic director at Louis Vuitton, has created a unique recording, exclusively for this book.

Product Description

as related art and literature The Age of Undress explores the emergence and meaning of neoclassical dress in the 1790s, tracing its evolution from Naples to London and Paris over the course of a single decade. The neoclassical style of clothing-often referred to as robe a la grecque, empire style, or undress -is marked by a sheer, white, high-waisted muslin dress worn with minimal undergarments, often accessorized with a cashmere shawl. This style represented a dramatic departure from that of previous decades and was short lived: by the 1820s, corsets, silks, and hoop skirts were back in fashion. Amelia Rauser investigates this sudden transformation and argues that women styled themselves as living statues, artworks come to life, an aesthetic and philosophical choice intertwined with the experiments and innovations of artists working in other media during the same period. Although neoclassicism is often considered a cold, rational, and masculine movement, Rauser's analysis shows that it was actually deeply passionate, with women at its core-as ideals and allegories, as artistic agents, and as important patrons.
