Categories: [MOTOR CARS: GENERAL INTEREST](#), [Places & peoples: general & pictorial works](#), [ROAD & MOTOR VEHICLES: GENERAL INTEREST](#), [SPORT, TRAVEL AND LEISURE INTERESTS](#), [TRANSPORT TECHNOLOGY](#), [TRANSPORT: GENERAL INTEREST](#), [TRAVEL & HOLIDAY](#)

### Product Description

Remarkable Road Trips collects over 50 of the most spectacular, dangerous, and thoroughly memorable road trips from around the world. Entries range from the shortest - the Guoilang Tunnel hewn into the side of a cliff face in China, to the longest, the Dempster Highway in desolate stretches of Arctic Canada. Some can be driven in a day or less, others may take four or five; the variety of landscapes and terrain and even latitudes is huge. For the adrenaline rush, there is even the old Nurburgring circuit in Germany. Common to all of them is a gallery of stunning photographs making them bucket-list destinations of not just petrolheads but those wishing to seek jaw-dropping scenery without packing hiking boots and a kagoule. They are all driveable, and the book includes distances and recommended stopping off points. Remarkable Road Trips continues the format established in the bestselling 'Remarkable' series, which combines spectacular photography of popular and niche sporting venues from around the world. Routes include: Wild Atlantic Way (Ireland), North Coast 500 (Scotland), Cabot Trail (Canada), Nurburgring Nordschliefe (Germany), Garden Route (South Africa), Blue Ridge Parkway, (USA), Jebel Hafeet (United Arab Emirates), Transfagarasan Road (Romania), Great Ocean Road, (Victoria, Australia) Amalfi Coast Road (Italy), Milford Road (South Island, New Zealand), Hana Highway (Hawaii), Passage du Gois (France), Grossglockner High Alpine Road (Austria), Atlantic Road (Norway), Ring Road (more exciting than it sounds, Iceland), Icefields Parkway (Canada), Route 66: Arizona (USA).

### Product Description

As Land Speed Record historian David Tremayne states in his foreword, 'This is a wonderful book that celebrates passion.' In a remarkable first book, Barry John has celebrated his life-long passion for the quest for speed by writing, illustrating and designing this fascinating history of record-breaking on land. Along with his informed and detailed text, his beautiful artwork shows all significant record-breakers in their immense variety, each illustrated in profile and accompanied by a cameo portrait of its driver. From the start of it all in the late 19th Century to today's challengers seeking to reach 'the last frontier', 1,000mph, the story that unfolds will enthrall not only enthusiasts for the subject but anyone appreciative of innovative engineering and brave human endeavour.

Product Description

NEW YORK TIMES BESTSELLER A fascinating fear of flying book from a commercial airline pilot and author of the popular website askthepilot.com. For millions of people, travel by air is a confounding, uncomfortable, and even frightening experience. When you go behind the scenes, however, you can see that the grand theater of air travel is actually fascinating. From the intricate design of airport architecture to the logistics of inflight service, here is everything you need to know about flying. Commercial airlines like to hide the truth from customers and do nothing to comfort nervous fliers. And what's scarier than the unknown? In this aviation book, pilot Patrick Smith breaks down that barrier and tells you everything you need to know about flying, including: How planes fly, and a revealing look at the men and women who fly them Straight talk on turbulence, pilot training, and safety The real story on delays, congestion, and the dysfunction of the modern airport The myths and misconceptions of cabin air and cockpit automation Terrorism in perspective, and a provocative look at security Airfare, seating woes, and the pitfalls of airline customer service The true colors and cultures of the airlines we love to hateCockpit Confidential is a thoughtful, funny, and at times deeply personal look into the strange and misunderstood world of commercial flying. If you liked other books about airplanes for adults, including Soar by Tom Bunn or Skyfaring, you'll find reassurance, humor, and guidance in Cockpit Confidential. Anyone remotely afraid of flying should read this book, as should anyone who appreciates good writing and great information. -The New York Times, on ASK THE PILOT Patrick Smith is extraordinarily knowledgeable about modern aviation...the ideal seatmate, a companion, writer and explorer. -Boston Globe

### **THE MODEL T** A Centennial History

#### Product Description

I will build a car for the great multitude. It will be large enough for the family, but small enough for the individual to run and take care of. It will be constructed of the best materials, by the best men to be hired, after the simplest designs that modern engineering can devise. But it will be so low in price that no man making a good salary will be unable to own one-and enjoy with his family the blessings of hours of pleasure in God's great open spaces. -Henry Ford

First rolled out in 1908 with an \$850 price tag, the Model T Ford was the nation's first mass-produced, affordable, and versatile motor vehicle. It made Americans mobile as never before, spurred a revolution in manufacturing methods, and marked a sea change in automotive design and engineering. Originally written for the centennial celebration of the Model T, Robert Casey captures the remarkable story of that car's history and development and of its long-lasting impact on America. Here are the people who built the Model T and how, the folks who purchased it and why, and the profound technological leaps in mass production and mass consumption that we rightly associate with Ford's automobile. Casey discusses how the car was designed, built, sold, and driven, as well as how owners tinkered with it. He describes the experience of driving a Model T and explains how a few engineering innovations—a one-piece cylinder block with detachable cylinder head, a clever flexible suspension system, the use of lightweight vanadium alloy steel—led to the car's reliability and popularity and spurred innovations across the motor vehicle industry. Richly illustrated with archival photos from *The Henry Ford*, *The Model T* is the definitive history of an iconographic piece of American technology.

### Product Description

Managing Airports presents a comprehensive and cutting-edge insight into today's international airport industry. Approaching management topics from a strategic and commercial perspective, rather than from an operational and technical viewpoint, the book provides an innovative insight into the processes behind running a successful airport. This fifth edition has been fully revised and updated to reflect the many important developments in the management of airports including: \* New content on: evolving airline models and implications for airports, self-connection, digital marketing, sensor and beacon technology, policy decisions and economic benefits, and climate change adaptation. \* Updated and expanded content on: airport privatisation, economic regulation, technology within the terminal, non-aeronautical innovations, service quality and the passenger experience. \* New and updated international case studies to show recent issues and theory in practice. Updated case studies from emerging economies such as China, India, and Brazil. Accessible and up-to-date, Managing Airports is ideal for students, lecturers and researchers of transport and tourism, and practitioners within the air transport industry.

### Product Description

This is the most beautiful book of its kind: celebrating the art and design of the luxury motorcycle by presenting forty of the best-designed and most enduringly iconic motorcycles ever made, spanning half a century. The book showcases forty rare and exceptional motorcycles, from 1905 to 1956, presented in chronological order, illustrated with stunning studio photographs that present the machines as works of art and wonders of design in themselves. An international roster is featured: a 1905 Peugeot Factory Racer, a 1916 Indian Power Plus, a 1929 Majestic, a 1936 Excelsior Manxman, a 1951 Harley Davidson 750CC WR, a 1951 Vincent 1000CC Black Shadow, and a 1955 Triumph Tiger Cub, among others. Written by a motorcycle collector and expert, the book presents the history of the motorcycle through the most significant makes of all time. Each is accompanied by detailed images and texts covering the bike's background, legends behind the machines, feats of design and engineering, and tales of classic races, rallies, and motorcycle shows. The book is enhanced with reproductions of period ads and historic photos, evoking a sense of time and place.

### Product Description

At the Berlin Auto Show in 1938, Adolf Hitler presented the prototype for a small, oddly shaped, inexpensive family car that all good Aryans could enjoy. Decades later, that automobile—the Volkswagen Beetle—was one of the most beloved in the world. Bernhard Rieger examines culture and technology, politics and economics, and industrial design and advertising genius to reveal how a car commissioned by Hitler and designed by Ferdinand Porsche became an exceptional global commodity on a par with Coca-Cola. Beyond its quality and low cost, the Beetle's success hinged on its uncanny ability to capture the imaginations of people across nations and cultures. In West Germany, it came to stand for the postwar economic miracle and helped propel Europe into the age of mass motorization. In the United States, it was embraced in the suburbs, and then prized by the hippie counterculture as an antidote to suburban conformity. As its popularity waned in the First World, the Beetle crawled across Mexico and Latin America, where it symbolized a sturdy toughness necessary to thrive amid economic instability. Drawing from a wealth of sources in multiple languages, *The People's Car* presents an international cast of characters—executives and engineers, journalists and advertisers, assembly line workers and car collectors, and everyday drivers—who made the Beetle into a global icon. The Beetle's improbable story as a failed prestige project of the Third Reich which became a world-renowned brand illuminates the multiple origins, creative adaptations, and persisting inequalities that characterized twentieth-century globalization.
