Product Description

CRQs for the Final FRCA is the first book of its kind and an invaluable resource for any candidate preparing to pass the written aspect of the Final FRCA. It has been specifically designed to reflect the new written examination format, providing ten complete CRQ examination papers and answer templates, with additional tips and references to aid further learning. Each paper has been carefully formulated to include the different topics contained within the examination and cover a vast area of the syllabus. Unlike other revision texts, this book will enable candidates to practise the CRQ format and refine their exam technique to ensure they are best equipped to succeed. It is written by a team of two consultant anaesthetists and two senior trainees who run the North West Final FRCA Exam Practice Course and have extensive experience of preparing trainees to pass the examination.
