Product Description

Succinct, logically organized, and supported by more than 100 board-style review questions, Blueprints Neurology delivers a complete review of key topics and concepts optimized for clerkship, shelf review, and USMLE preparation. This concise approach pares coverage to a perfect length for clerkship rotations and reinforces understanding with clinical vignettes, detailed diagnostic and treatment information, and case-based review questions at the end of the book with complete answer explanations. Concise, succinct chapters save time and focus your review on the most essential concepts. Extensively revised to include new and relevant content Updated! More than 100 board-style review questions detail correct and incorrect answers for comprehensive shelf and USMLE preparation. Updated! Case-based vignettes help you translate concepts to a clinical context and confidently prepare for clerkship. Newly added 4-full color highlights key content for a faster, more efficient review. eBook available for purchase. Fast, smart, and convenient, today's eBooks can transform learning. These interactive, fully searchable tools offer 24/7 access on multiple devices, the ability to highlight and share notes, and more
